S = suppressed

^aForeign doctoral recipients on temporary visas; does not include non-U.S. citizens with permanent resident visas.^bPhysical sciences include earth, atmospheric, and oceanographic sciences, mathematics, and computer sciences.^cSocial sciences include psychology, sociology, and other social sciences.

NOTES: Australia and New Zealand, Egypt, Israel, and South Africa are shown with separate estimates for each of the four major discipline groups. However, to preserve confidentiality, for each of these countries, physical sciences was combined with engineering and life sciences was combined with social sciences in estimating the percentages shown above.
